

The lidX app - the next generation mobile payment terminal

The lidX app is a comprehensive Android solution that replaces traditional payment terminals and offers numerous additional functions. It transforms any Android device into a fully functional terminal, whether it is a smartphone or a tablet. Licenses and acceptance agreements can be easily requested within the app.

Key advantages of lidX app

- ✓ Fully compatible: Runs on all Android devices from version 8
- ✓ Flexible use: Whether with smartphones, tablets or special terminals - the app adapts to your hardware
- ✓ Secure: Thanks to comprehensive rights management, screen lock and reset functions everything remains under control
- ✓ Payment diversity: Integrate popular payment methods and expand them as required

The most important functions at a glance

- ✓ 100+ languages: Fast switching between languages - perfect for international customers
- ✓ Customised language settings: Different languages for cashiers, customers and administrators
- ✓ Versatile tipping functions: Amount entry, fixed amount, percentage or by up/down rounding buttons
- ✓ Payment functions: Payment, cancellation, credit note and tip
- ✓ Transaction overview: With functions for repeat print, cancellation and credit note
- ✓ Simple operation: Intuitive menu navigation and input
- ✓ Receipt output: As text or QR code, by e-mail or via the share function
- ✓ Receipt printing: Device-dependent as text or QR code
- ✓ Cash register interfaces: Supports ZVT and REST API
- ✓ Advertising on receipts: Enables adverts and receipt advertising
- ✓ Status and terminal management: With functions for resetting when changing devices

Planned extensions

- ✓ White label functions: For customised solutions
- ✓ Extended payment methods: Support for additional card types and alternative payment methods
- ✓ Dynamic Currency Conversion (DCC) and VAT refund

System requirements:

- ✓ Android version \geq 8.0
- ✓ NFC (for card payment), camera and internet access required
- ✓ Automatic security measures by zDefend if Google Mobile Services are missing

Installation

1. Activate the internet connection.
2. Check Android for the latest updates and security patches.
3. Download the app: Via our server (<https://lidx.io/contact/>) or QR Code.
4. Install via the Files app (not directly via the browser due to security requirements).
5. Initial start: Grant required authorisations.
6. Register terminal and set up free trial version.
